DETAILED ACTION

On February 26, 2008, an Office Action was sent to the Applicant rejecting claims 1-153. On May 22, 2008, the Applicant responded with amendments to the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-153 are rejected under 35 U.S.C. 103(a) as being unpatentable over Virgin (6,826,542) in view of Ensel (6,493,685).

Virgin discloses the invention substantially as claimed; however, Virgin does not disclose a payment engine for electronically transmitting invoice payment instructions from the customer to the invoice or a pulling component and means installable on at least two invoicers' web sites or on web sites of entities working on behalf of said invoicers for reading each invoicers' data, packaging said invoicer's data and sending said data to said remote customer interface in response to customer data requests.

Art Unit: 3691

Ensel teaches account presentment comprising a payment engine for electronically transmitting invoice payment instructions from the customer to the invoice or a pulling component and means installable on at least two invoicers' web sites or on web sites of entities working on behalf of said invoicers for reading each invoicers' data, packaging said invoicer's data and sending said data to said remote customer interface in response to customer data requests (col.3, line 40 to col.4, line 57). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Ensel within Virgin for the motivation of allowing efficient customer reviewing of account information.

Response to Arguments

Applicant's arguments with respect to claims 1-153 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3691

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
